DETAILED ACTION

1. This action is responsive to the amendment filed March 10, 2010. In the instant amendment, claims 8, 12, 15, 22, and 25 have been amended; and claims 16-20 and 26-29 have been canceled.
2. The 35 USC §101 rejection over claims 12-21 is withdrawn in view of Applicant's amendments.
3. Claims 1-15, 21-25, and 30 have been examined and are allowed (renumbered 1-21).

Examiner's Statement of Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

As indicated in the previous Office action mailed December 10, 2009 (page 21), the cited art does not teach and/or fairly suggest at least claimed limitations recited in such manners in independent claim 1 "*...generate, in response to parsing the plurality of transaction definitions, a plurality of schema definitions for at least a portion of the parsed transaction definitions, wherein the schema definitions are written in a self-describing language; wherein a first schema definition is operable to map the one or more parameters associated with a first transaction definition to a first document written in the self-describing language; and wherein a second schema definition is operable to map a second document written in the self-describing language to the one or more parameters associated with a second transaction definition.*" and similarly recited in such manners in independent claim 8.

As Applicants pointed out in the instant Remarks, the cited art (Ankireddipally and Scheier) do not disclose and/or fairly suggest at least claimed limitations recited in such manners in independent claim 12 "*...wherein the first transaction message is to be sent to the target system; wherein the document generator is executable to further receive, from the target system, a response message that is responsive to the*

first transaction message, and convert the response message into a second document according to the second schema definition, wherein the second document is written in the self-describing language; wherein the object generator is executable to further generate a second object from the second document; and wherein the software service is executable to use the second object to provide, to the requestor, data responsive to the transaction request.” and similarly recited in such manners in other independent claim 22 (Remarks, pp. 11-12).

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
